The following is an examiner's statement of reasons for allowance: The prior art fails to teach a method and apparatus for generating a radiation image of an object, among other features, comprising: image acquisition means for detecting a radiation image of an object and generating a signal representation of pixel values of the image; memory means for storing a matrix of correction values obtained by read out of a radiation image stored by a radiation detector has been subjected to a flat field exposure; a signal processing unit with a first input consecutively receiving signal representation of individual pixel values of the radiation image immediately following generation of the signal, and a second input simultaneously receiving a corresponding correction value from the memory, wherein the unit correcting a pixel value received at the first input by a corresponding correction value simultaneously received at the second input.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Dewaele 5,832,055 discloses a method for correcting a radiation image comprising a calibration matrix.
